Mobile VR Tours

Beca VR training tours are applications that can run on a smart phone. They are tailored to a particular site and training outcome.

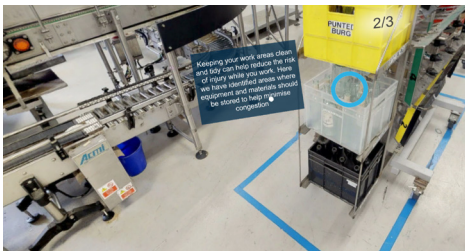

Users move through the tour and interact with the virtual environment using a very simple, entirely 'hands free' interface. Users either 'find' or are directed to training content within the tours. You can complete the module from anywhere.

Benefits

Always available – deliver the tour anywhere, anytime. Users will gain full site knowledge without disrupting staff or operations.

Always relevant – with consistent, high quality, systemised content, you'll know you're delivering the right messages for your business. We'll bring our in-depth understanding of industrial sites and processes, baking it in to the training content and design.

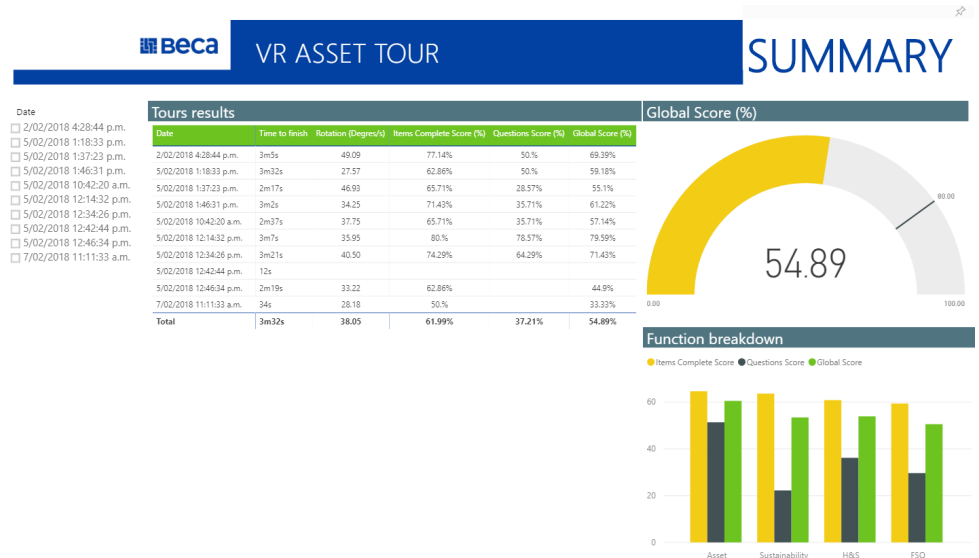

Always engaging – A totally fresh approach to training that's easy, immersive and exciting. Studies also show VR enables up to 60% better knowledge retention.

HEALTH AND SAFETY TRAINING • SOPS • SITE INDUCTIONS • CONFINED SPACE TOURS • OPERATOR TRAINING • NEW STAFF ON-BOARDING • TRANSPORT PRE-CHECKS • ENVIRONMENTAL AND SUSTAINABILITY AWARENESS • MASTER PLANNING AND SITE DESIGN

Peace of Mind and Powerful Insights:

With completion records and scorecards sent directly to your central analysis tool you'll know immediately who completed the training and how they fared. Consistency of content and delivery enables you to accurately measure and improve.

Data can be analysed and reported on directly from the system, meaning no more paperwork.

There are a number of options depending on what you want to achieve and what content and data you already have. Once we have reality capture data and tour content is set, the app and result analytics tool can be created and ready for use in as little as two weeks. Get in touch with us for a chat.

Option 1: Let us sort it

We'll work with you to produce training content. Then we'll capture site data, design the tour and build the app.

Option 2: Take Charge

You provide the training content and site data, we'll design the tour and build the app.

Try it out:

1. Download the Beca VR App from the App store (iPhone) or Google Play (Android):
2. Email Tineke.stewart@beca.com and we'll send you the password
3. Grab your Google Cardboard or equivalent and have a go!

Learn more and get started

Drop us a line, we'd love to chat through the process and answer any questions.
